Introduction

How to use this Guide

Welcome to the Promap training course companion. This guide is designed to work in conjunction with the range of training courses designed for Promap.

For each section of your training course you will find an image page along with some hints and tips relating to that section.

About Promap

With over 27,000 users, Promap is the easiest and most reliable system for busy surveyors, architects, developers, housebuilders, engineers and property professionals who require immediate access to mapping and data.

As the UK’s market leader to the property professional, Promap puts you in control by providing a powerful and flexible tool for instantly locating, viewing, measuring, customising, printing and exporting maps. In addition, you can export a number of datasets in a variety of formats for use with CAD and GIS systems.

As well as mapping, Promap also gives you access to more products and features than any other online mapping system. These include:

- Current small and large-scale mapping
- Aerial imagery
- Historical mapping
- Contamination reports
- Flood reports

- Utilities reports
- 3D models & height data
- Licence management
- Planning reports
- Flooding, ownership and land use instantly available on screen

In addition there are now a number of free and Premium Layers which can be overlaid quickly and easily on to the mapping to get a clearer picture of the status of your site.

Promap

Promap offers three distinct journeys through the system which are as follows:

Export

This section is for users looking to export datasets, from the wide range available in Promap, into other applications such as CAD packages and GIS Systems.

Print

For those who are looking to locate a site, outline the site to obtain measurements and then print the map off as a PDF or a Jpeg. Great for planning applications and valuations.

Reports

A range of reports designed to give a comprehensive view of an area ahead of purchase or sale, highlighting information both above and below ground. Ideal for site assessment and due diligence.

Accessing Promap

- You will only be prompted to login when you are purchasing a product or to view the OS Mastermap Topography Layer
- Use your Promap login at any time to log in/out using icon 4 in the diagram below

Searching for new sites

- Use the **Address Search Bar** to locate your site. You can search using address details, OS tile, Grid Reference and Land Registry Title Number
- When searching using the Land Registry Title Number, simply type this into the address bar to locate your site and the Land Registry polygons will be auto filled onto the map when displayed

Note: The Land Registry Title Numbers search is only applicable for England and Wales.

Title Number

DN1234 - 22, Springfield Close, PLYMOUTH, PL9 8QG

Uploading shape files

To upload a predefined shape file into Promap which will map your polygon directly onto the required map location use the upload option.

Note: The upload option is also available under the Drawing and Measuring tools.

Site marker

A **Site marker** will appear when you search for a site, or when you toggle this on. There are 5 options for the Site marker and to change your preferred option go to the Account option at the top right of the screen, then click Admin and My Settings.

Nearby Promap orders and saved maps

- If you are searching for a new site and you see the **Nearby Orders** icon appear under the Promap logo in the top left-hand corner of the screen, it indicates a previous order within 500m of your search
- Click the eye icon next to previous orders or previously saved maps to access them

56 nearby orders

When searching for a new site if you see the Nearby Saved Maps icon appear under the Promap logo in the top left-hand corner of the screen, it indicates a map has been saved by somebody within your organisation for a site within 500m of yours.

39 nearby saved maps

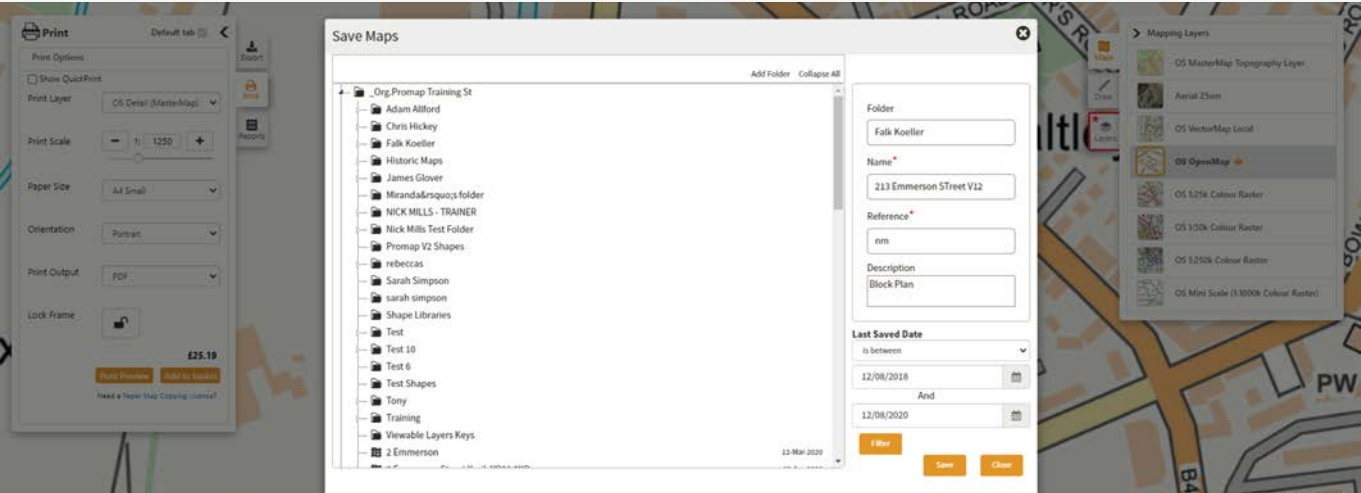

Saving and saved maps

SECTION 2

Saving new maps in Promap

- To access the **Save Maps Window** at any time click on the Save icon  along the top toolbar, on the left-hand side
- Entering additional information into the Reference and Description fields of the Save Maps window will make searching using the **Search by File Name or Ref** facility much easier
- Create subfolders in the **Save Maps** window using the **Add Folder** option in the top right-hand corner. Subfolders will be created within any folder that you have selected Name or Ref facility much easier

- Create subfolders in the Save Maps Window using the Add Folder option in the top right-hand corner. Subfolders will be created within any folder that you have selected
- Note:** You must be logged in to use the **Open Maps** and **Save Maps** functions. The date filter will default to show maps saved in the last two years but you can update this to see older maps.

Browsing and opening your previously saved maps

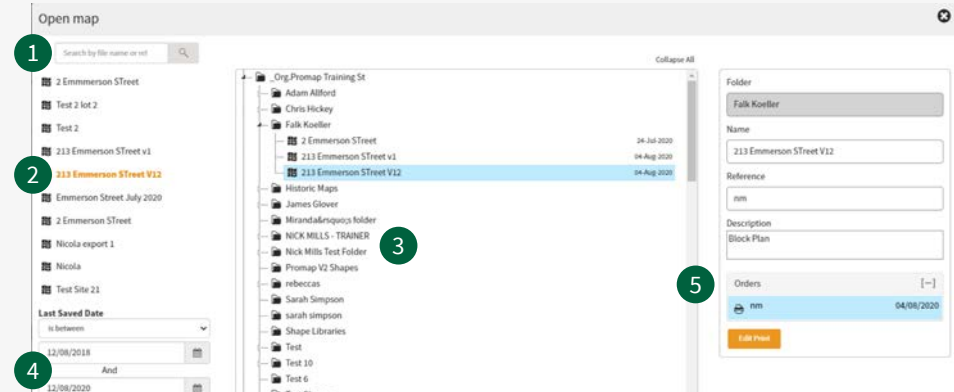

- To locate previously saved maps use the **Open Save Map** icon  along the top toolbar, on the left-hand side
- Search** allows you to search for previously saved maps by File Name or Reference
- Recent** shows the 10 most recently accessed maps on the new system
- Browse** shows all the folders and maps you have access to on Promap
- When you have selected your map in the Open Save Map section, the **Orders** tab on the right hand side of the dialogue box will show if any orders have been placed in the new system for it. Select the order and you will be given the option to go in and edit the print.

Saved maps date filter

- The date filter will default to show maps saved in the last two years but you can update this to see older maps
- The Search functionality will search all maps regardless of the date filter

Saved maps administration

- To rename a map when the map is selected, simply change it's name in the right hand window and hit the save button that is available
- Move maps and folders by simply holding down the left click over the required map and dragging the map /folder to its new location. The icon will show a green tick when hovering over a file that it can be moved to and a red cross on a location where it cannot be moved to

- 1 Search
- 2 Recent
- 3 Browse
- 4 Saved Maps date filter
- 5 Orders

Using your previously saved maps

- You have a number of options when reusing your maps. The table opposite details these various options for each of the journeys
- Any map that has an order that is within its licence period will display under the **Orders** tab. From here you can re-download or edit maps that you have previously ordered. This will include in-licence orders from the previous version of Promap

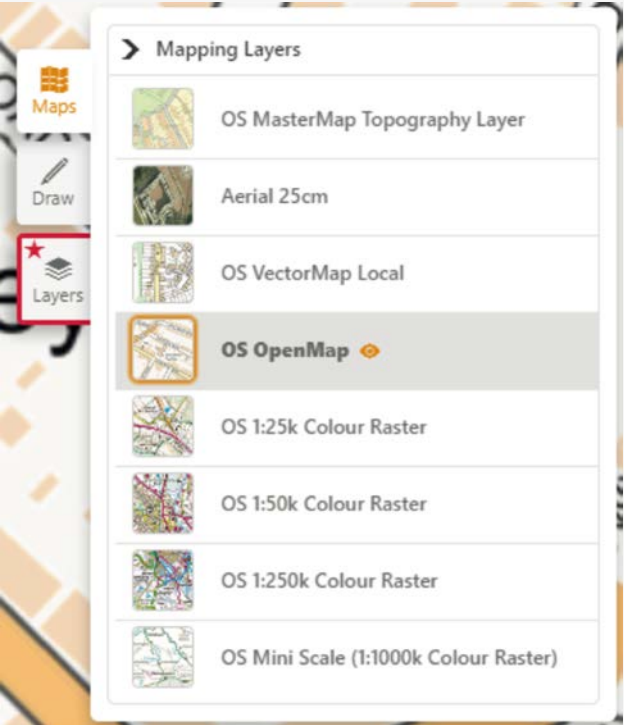

Print	Action	Description	Example
Print	Print	You can purchase a new Print from your Saved Map. This will come with a new 12 month licence and will cost the same as a new map.	I need to change the print frame of my map; the Print function will create a new map with a 12 month licence.
	Re-Print	Re-Print enables you to re-download your print order for a small charge. If you have a Paper Map Copying Licence, this can be done for no cost. Can only be done when the original order is in licence.	My client has a question regarding a previous map, however I cannot find the original. The Re-Print option provides an exact copy of my original purchased map.
	Edit Print	The Edit Print function enables you to make amends to your original map. The background mapping will not be updated nor can the print frame change. As with Re-Print there will be a small charge. If you have a Paper Map Copying Licence, this can be done for no cost. Can only be done when the original order is in licence.	I've finished creating my map, however my client has told me the site includes a building adjoining the north of the site. The Edit Print function will allow me to make these updates.
Export	Download File	Use this button to download your order. Can only be done when the original order is in licence.	I need access to the original file for a project that I was working on 6 months ago. The Download File function will allow me to retrieve this.
	Other Download Options	This function allows you to download your original order in a number of different formats. Can only be done when the original order is in licence.	I've just purchased my MasterMap order in a DWG format but meant to choose DXF. I'll use the Other Download Options function to request a new format.
Reports	Download File	Use this button to download your order.	I've purchased my first LandSearch report and it's now ready to download. I'll hit Download File to retrieve my order.
	View Your Data Now	Use this button to redirect to an online viewer that enables you to interact with your data.	I'd like to review the data from my LandSearch report in a more interactive way. I'll use the View Your Data Now function to get access to my online order.

Promap map layers

SECTION 3

- The **Mapping Layers** panel on the right-hand side allows you to select the layer you want to use. The available layers are as follows:

OS MasterMap Topography Layer (inc Schema 9)

Scale: 1:100 – 1:1,250 (Settlement)
1:100 – 1:2,500 (Rural)
1:100 – 1:10,000 (Moorlands)

Provider: Ordnance Survey

Common uses: Comprehensive mapping showing houses, factories, rivers, administration boundaries, building outlines and field boundaries

Styles: Colour, black and white and hybrid (combining aerial)

Aerial 25cm

Survey scale: 1:100 – 1:20,000 – Getmapping

Provider: Getmapping

Common uses: Site assessments, land use verification, infrastructure planning, risk evaluation, land and estate management, planning and analysis, property marketing

OS VectorMap Local

Scale: 1:3,000 – 1:10,000

Provider: Ordnance Survey

Common uses: Comprehensive maps showing fences, field boundaries, pathways, road names and buildings

OS OpenMap

Survey scale: 1:500 – 1:20,000

Provider: Ordnance Survey

Common uses: Offers roads, buildings, footpaths, water features and woods etc

OS 1:25k Colour Raster

Survey scale: 1:8,000 – 1:25,000

Provider: Ordnance Survey

Common uses: Offers clear street level mapping including building outlines, woodland and water, rights of way, points of interest and height contours

OS 1:50k Colour Raster

Scale: 1:15,000 – 1:60,000

Provider: Ordnance Survey

Common uses: Offers roads, buildings, footpaths, water features and woods etc

OS 1:250K Colour Raster

Survey scale: 1:75,000 – 1:250,000

Provider: Ordnance Survey

Common uses: Combines road, railways etc, with other key features

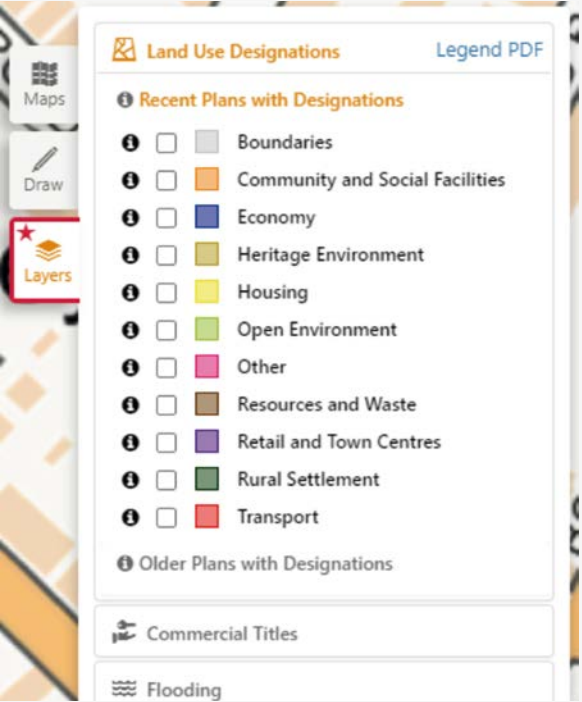

OS Mini Scale (1:1000K Colour Raster)

Survey scale: 1:300,000 – 1:1,000,000

Provider: Ordnance Survey

Common uses: Clean, simple mapping. Ideal for magazine and brochure illustrations

- The **Layers** panel on the right-hand side gives you access to useful data search as ownership information or flooding. Simply select the data from the list to view on the map

- There are a number of free datasets to view, however you can unlock the Premium Layers via a monthly subscription. Find general information about these on page 12 or for more in depth information please refer to our Data Layers user guide
- All the Free and Premium Layers can be viewed on the OS MasterMap Topography, Aerial, OS VectorMap Local and OS OpenMap layers

+ Notes

Land Use Designations dataset

The Land Use Designations is a dataset of Local Development Plans, which are documents published by the Local Authority and detail the various planning strategies for the region. These documents are intended to guide development and include detailed proposals for individual sites as well as identifying areas suitable for housing, industry, retail, conservation or other land uses. This dataset has been derived from the normalisation of land use types shown in the plans and indicates their extents and locations as points, lines and polygons.

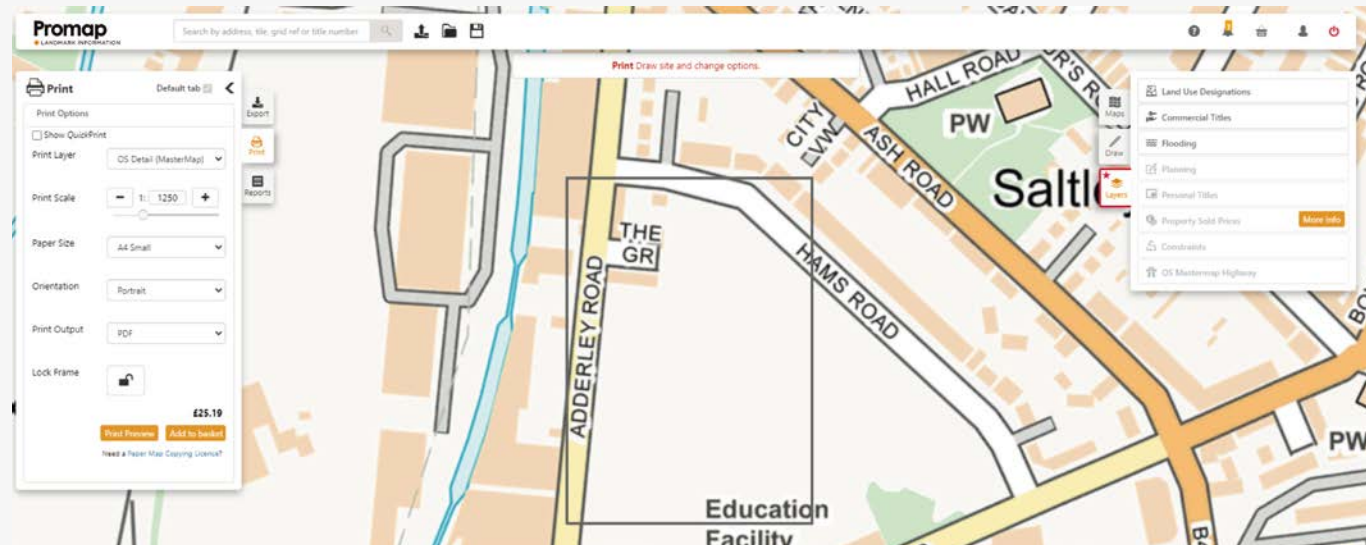

+ Notes

Corporate Ownership dataset

This dataset contains a list of freehold or leasehold title registrations across England and Wales, where the registered legal owner is a 'non-private individual' organisation, which is incorporated in or outside the United Kingdom.

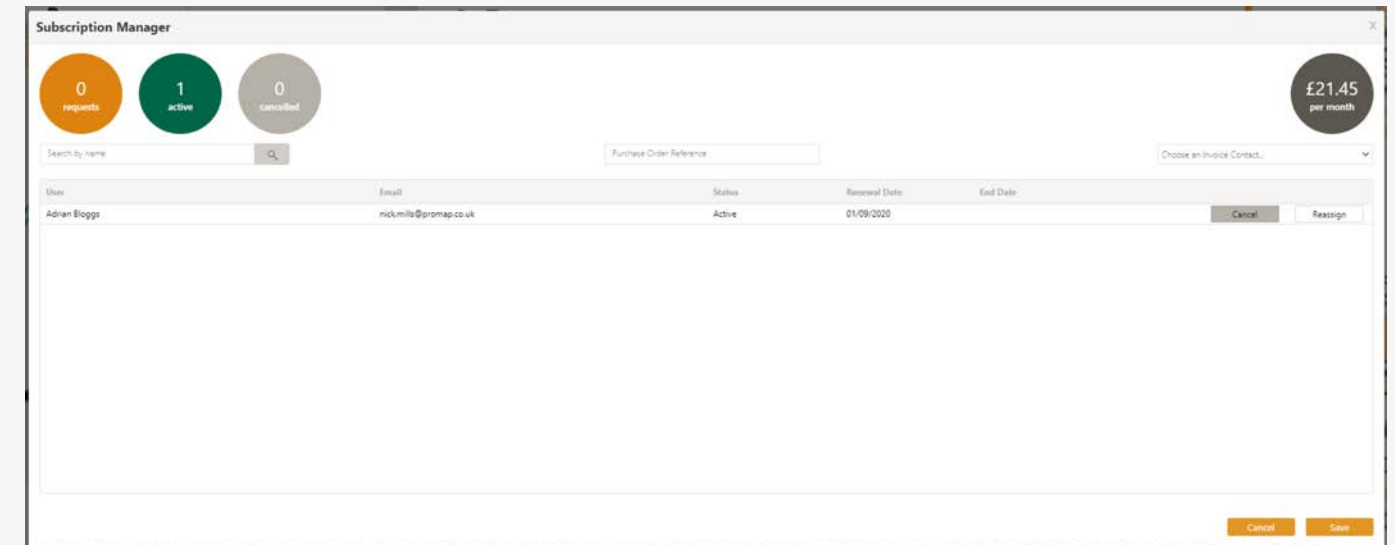

Premium layers

- Additional datasets including Planning Applications, Personal Ownership, Constraints, Property Sold Prices and Highways. These are available as part of the Promap Premium Subscription
- If you are a non-admin user, you can request access to this subscription, and this request will need to be signed off by an admin user. If you are an admin user, you can sign up to this subscription instantly
- Once active, the dataset will be enabled within the Layers tab for your individual username
- All the Free and Premium Data Layers can be viewed on the OS MasterMap Topography, Aerial, OS VectorMap Local and OS OpenMap layers

Promap subscription management

- As an Admin user within Promap, you can manage all subscriptions within your organisation. The **Subscription Management** tool can be found within the account tools in the top right-hand corner of the screen by clicking the Profile icon
- You can add new subscription licences to users by typing their name into the search bar and clicking Add
- You can reassign licences from one username to another
- You are also able to cancel licences, this will remove a user at the end of the current billing month. The user's access will remain in place until the end of that month

Creating a map for print

SECTION 5

Defining your print area

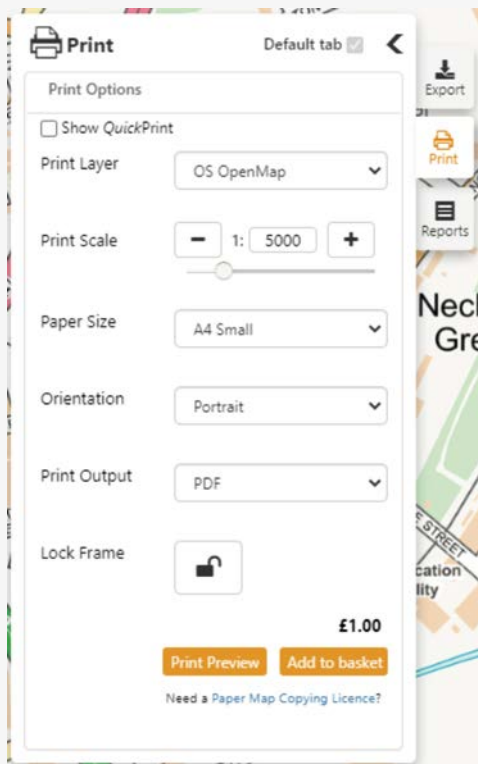

Once you have selected the map layer, select **Print** from the **Task tabs**. You will be presented with the following options:

- To fine tune the position of your frame, alter the displayed options in the image opposite and drag the map on screen until the area you require is outlined
- If you have a **Paper Map Copy Licence** you will find you have an additional Print Output option allowing you to take both a PDF and an image of the map at the same time, significantly speeding up the ordering process if you need both
- Use the **Lock Frame** option to hold the frame in position whilst you are adding your customisation

Note: **Nearby Orders** will let you know if previous orders have been placed for this area before and allow you to see the details of these.

The **QuickPrint** option allows you to view a simplified layout for printing. Please refer to our QuickPrint user guide available on the training website for more details.

If printing is going to be the task you undertake most often, select the default tab option at the top of the print options section on the left-hand side to default to there whenever you log in.

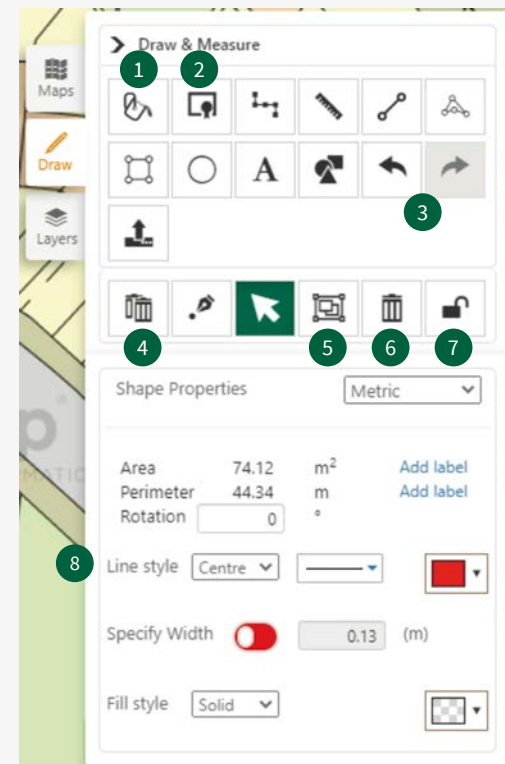

Printing, drawing and measuring tools – creating shapes

- To quickly remove the site marker from the map use the **Toggle** option located on the task bar at the bottom of the screen
- Quickly outline a single shape with a self- contained boundary using the **Fill** tool
- Outline a freehold title using the **Title Fill** tool
- Edit a shape's appearance in the **Shape Properties** by left clicking once on the required shape
- To quickly combine adjacent or overlapping shapes into one shape, use the **Merge** tool and select each one in turn until you have obtained the required area
- To close a shape or finish a line, double left click on the mouse
- To delete a single item select it on the map, then use the **Delete Selected Drawing** option. To delete all the shapes use the **Delete All Drawings** option
- L & A key shortcuts allow you to accurately draw a shape or line by defining the length and angle of the next edge

Note: The Fill Tool along with Snap to Point are only available on the OS MasterMap Topography Layer. The Title Fill Tool is available on the OS MasterMap Topography, Aerial, VectorMap Local and OS OpenMap Layers.

When using the Title Fill Tool your selected shape will be outlined in red but Promap will also highlight any other areas of land connected to this title in blue. The Title Fill Tool is only available for England and Wales.

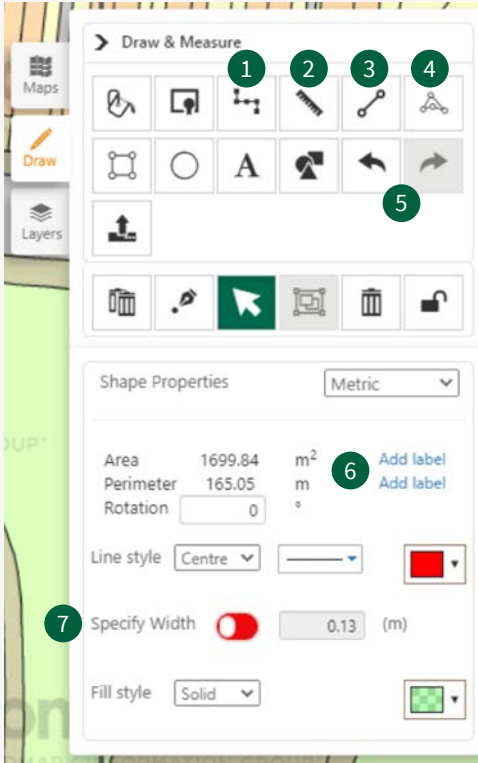

- 1 Fill Tool
- 2 Title Fill Tool
- 3 Undo/Redo
- 4 Delete All Drawings
- 5 Merge Tool
- 6 Delete Selected Drawing
- 7 Lock Shape
- 8 Shape Properties

Printing, drawing and measuring tools – obtaining area and boundary measurements

- Selecting **Snap to Point** will populate the screen with points that show any changes in direction of the line that they are on. When using it to obtain an area or boundary measurement make sure you click on all the dots to ensure an accurate measurement
- Use the **space bar** in conjunction with the left mouse button to join up multiple snap to point dots

Note: When using snap to point on the OS MasterMap Layer you will be required to zoom in until the snap to point option becomes active, as you then roam into a new area on the map it will automatically load the points for that area.

- 1 Snap to Point
- 2 Measure Tool
- 3 Line Tool
- 4 Shape Tool
- 5 Undo/Redo
- 6 Add Label
- 7 Shape Properties

- Use the **Undo/Redo** buttons if you make a mistake, or **CTRL + Z / CTRL + Y**
- To reopen a shape created in Promap, select the shape and use **CTRL + Enter**
- To add text for your area, boundary or length measurement, click on the **Add Label** option in the **Shape Properties** box
- To accurately position dots using easting and northing co-ordinates use the **Location** section on the bottom tool bar, which show the co-ordinates of your cursor. This bottom task bar will also display the OS Tile Number and National Grid Reference

Note: When you are in the process of outlining or measuring boundaries using the **Line** or **Shape** tools you can move the map to access new areas by holding down the left-click button and dragging the map in the required direction.

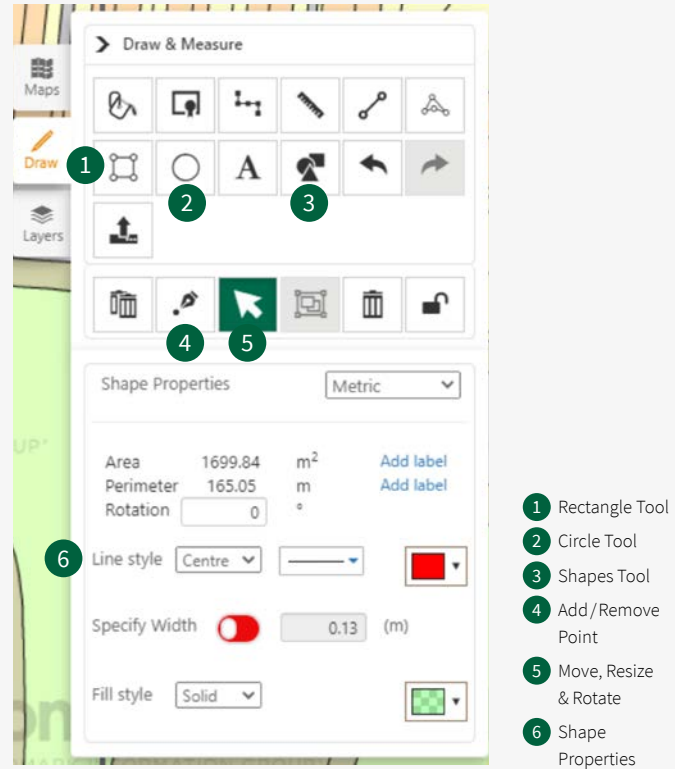

- Use the **Line** tool to define linear features
- Quickly measure features using the **Measure** tool, which will display the measurements as you are adding the line
- Add arrowheads to a line within the **Shape Properties** box for your line

Note: The **Measure** tool is useful to quickly identify the distance between your property and amenities in the area.

+ Notes

Printing, drawing and measuring tools – adding shapes, lines and rotating objects

- Accurately define the height and width of a rectangle in the **Shape Properties** box
- When adding a circle, you can set the radius in the Shape Properties box
- To alter a completed shape or see exactly what points on an outline you have already selected, select the Add/Remove Points tool and click on the outline of the shape you wish to alter
- The **Shapes** tool will allow you to add a wide range of shapes and predefined plot sizes to the map from the Promap Shapes library, or you can create and save your own libraries of items
- Use the **Move, Resize or Rotate** option to reposition your shape on screen
- You can add Gridlines to your map, this option is found on the My Settings tab within the Admin Accounts tools in the top right-hand corner. Simply click the Profile icon and Admin

Printing, drawing and measuring tools – shape sub-menu

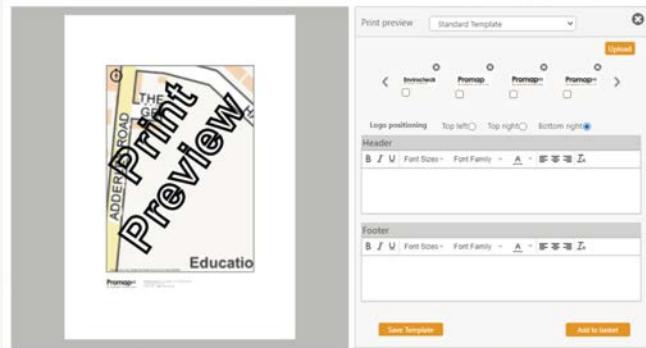

- Right click on your selected shape on the map to bring up the **Shape sub menu** which will then provide you with a number of additional options
- To quickly add a duplicate of your selected shape to the map use the Copy and Paste options
- As well as the main lock option for your shape under the drawing and measuring tools there is an additional **Lock/Unlock** option in this sub-menu
- It is possible to group shapes in Promap by holding down the shift key and selecting the shapes you want to group, once they have been selected simply right click and select the group option
- The **Position** option in the sub-menu will allow you to alter the position of your selected shape in relation to the other shapes you have added to your map. For example it will allow you to send a shape behind another one or bring a shape in front of another one
- To add a shape to an existing drawing library of your own or create a new library just right click on a selected shape to display the dialogue box and select add to drawing library
- Select **Special** (Lock to Background) to make the OS boundary lines visible through your site outlines. Please note you must be on the Black and White MasterMap layer in order to use the Lock to Background option
- To add a buffer to your shape of a specific size simply select the **buffer** option and enter the buffer size you require

Headers, footers and company logos

- To insert company logos, headers and footers on to your map select the **Print Preview** option from the **Print Options** box
- To insert a company logo into the headers and footer firstly upload using the **Upload Logos** tab, and then add it to the map using one to the three position options

Note: Please ensure your logo is in a Jpeg or PNG format.

- The PDF template will provide a north arrow on the map, along with the copyright and scale information. When printing the OS MasterMap Topography Layer a scale bar is also included
- If you are regularly applying your company logo in the same position and including standard text such as a disclaimer you can save them as a template which can then be easily applied via the template option at the top of this dialogue box

To proceed to the next stage please turn to the relevant section below:

- To export a digital file proceed to Section 6
- To order a report proceed to Section 7
- To complete your print order and checkout turn to Section 8

Exporting a digital file

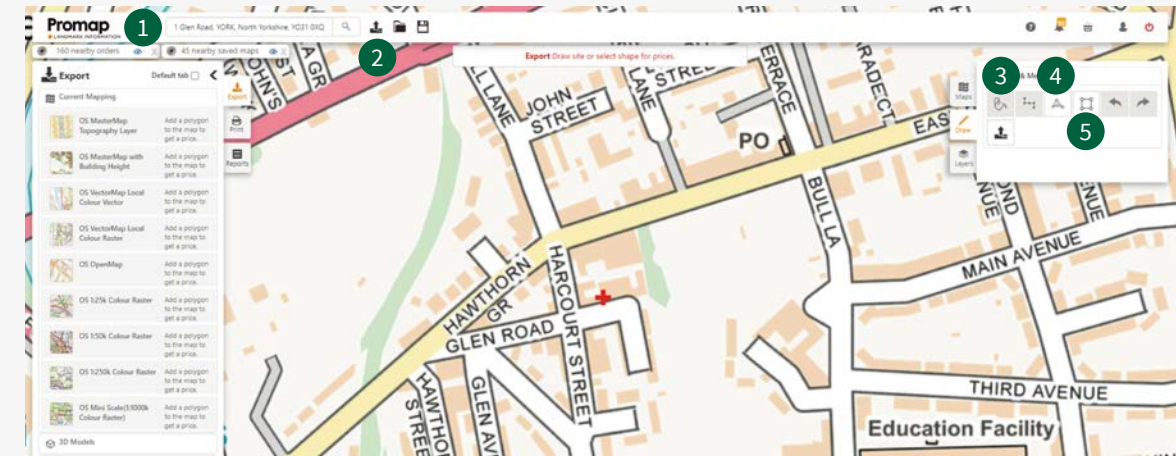

Defining your export area

- Selecting the **Nearby Orders** tool will display details of the previous orders for this area
- Note:** If exporting is going to be the task you undertake most often select the default tab option at the top of the export section on the left-hand side to default to there whenever you log in.
- To upload a pre-defined shape file into Promap which will map your polygon directly onto the required map location use the **upload** option

Note: The upload option is also available under the drawing and measuring tools if you already have your map displayed.

- To select your datasets you will first need to define your site area using either:
 - The **Fill** tool which will quickly allow you to outline any single self contained polygon on the map
 - The **Shape** tool which will allow you to select and export the exact area that you require
 - The Rectangle tool which allows you to set a rectangle area of your choice
- Select your required area in order to receive an accurate price

Note: The Fill tool is only available on the OS MasterMap Topography Layer.

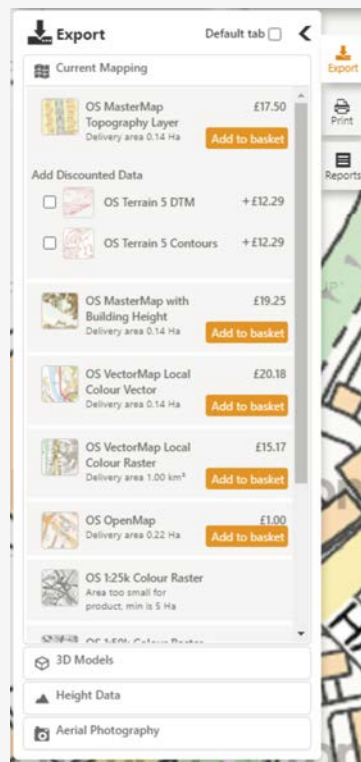

- 1 Nearby Orders
- 2 Upload Shape File
- 3 Fill Tool
- 4 Shape Tool
- 5 Rectangle Tool

Selecting your datasets

- You will be able to select your export format and gridline options in the **Basket** when checking out
- Datasets available from Promap Export include:
 - Current Mapping Layers
 - Zmapping 3D Models
 - OS Detail 3D Data Bundle
 - OS Digital Terrain Model (DTM) and Contour Height Data
 - EA DTM and Digital Surface Model (DSM) Height Data
 - Getmapping Aerial Imagery at 12.5cm, 25cm, 50cm and 1m resolution

Note: If you are selecting the OS MasterMap Topography Layer and either the OS Terrain 5 DTM and /or Contour data, you can select them as a bundle to gain a significant discount on the height data.

Ordering a report

Defining the area for your report

- To select your reports you will first need to define your site area using either:
 - The **Fill** tool which will quickly allow you to outline any single self-contained polygon on the map
 - The **Shape** tool which will allow you to select and export the exact area that you require
 - The **Rectangle** tool which allows you to set a rectangle area of your choice
- To upload a predefined shape file into Promap which will map your polygon directly onto the required map location use the upload option

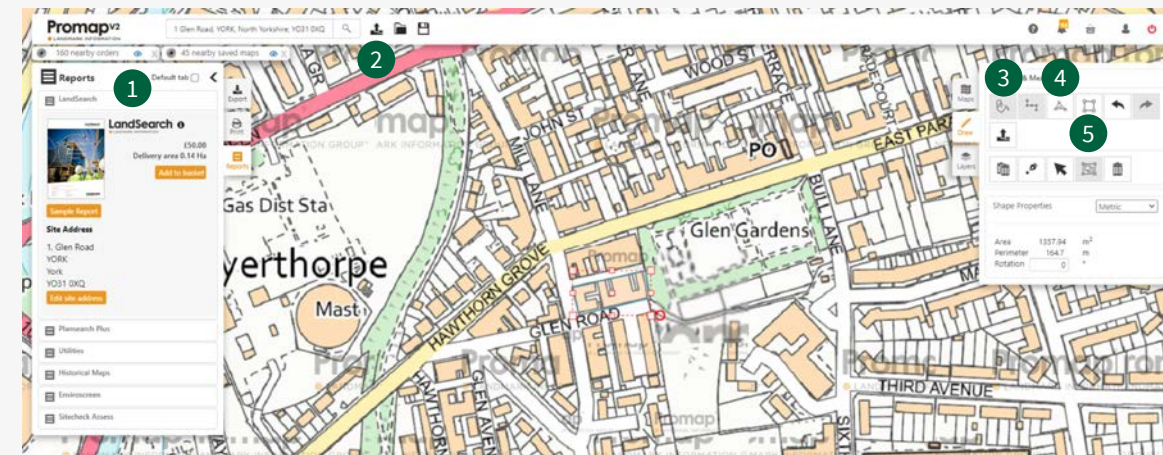

- Select your required area in order to receive an accurate price

Note: Reports can be ordered from any map layer.

The Fill tool is only available on the OS MasterMap Topography Layer.

The upload option is also available under the drawing and measuring tools if you already have your map displayed.

If ordering reports is going to be the task you undertake most often select the default tab option at the top of the reports section on the left-hand side to default to there whenever you log in.

Selecting your reports

LandSearch Development Site Assessment Report

Key features

- A development site assessment report that brings together all the information you would need to assess a new site including:
 - Land use designations
 - Planning
 - Ownership
 - Constraints
 - Local information
 - Local market analysis (PDF only)
- Ordering the report also allows you to access the free LandSearch viewer to interrogate the data to obtain a far greater degree of detail

Plansearch Plus

Key features

- This planning report for residential properties brings together all the planning information you need for your site and includes:
 - Planning applications (residential planning applications & non-residential planning applications)
 - Land use designations (housing & community, business & economy, resources & waste, transport infrastructure, heritage & open environment)
 - Your neighbourhood (rights of way, housing, population, education and amenities)
- The report will be emailed to you in PDF format and will be available to download within an hour of ordering it

Utilities

Key features

- A visual overview map of the search area
- A summary report showing a list of utility companies contacted
- Utility company response plans where affected or a response letter confirming the location is not affected
- Prevents expensive litigation if damage is caused
- Prevents delayed project design
- Prevents increased foundation costs
- Reduces added danger for the workforce involved

Historic Maps

Hints & tips

- Always preview your map before ordering. There are over one million maps in the database which have all been scanned in and the quality is going to depend on what condition they were in before they were scanned
- Historic Maps can be downloaded individually in PDF format
- Always save your Historical Maps to your computer before opening them, to prevent losing them
- Historic Maps are created at A3 size. They should therefore be printed to A3 paper to be viewed as intended. It is possible to print PDF files to A4 paper using Acrobat Reader, which is generally set up to resize large documents

- Online risk screening tool for contaminated land
- Comprehensive PI cover up to £5 million
- Professional opinion from Argyll Environmental Consultants given to indicate whether the site has PASSED or if FURTHER ACTION is required
- Looks at 130 different datasets including landfill, flooding, radon and mining
- Location map with features plotted on an aerial map
- Suitable for sites up to 2 hectares

Note: In most situations your Enviroscreen report will be sent within 15 minutes of ordering. However If FURTHER ACTION comes back the client will get an initial email advising them that information has been referred to our in-house consultants, then within 48 hours an email advising exactly what further action is required.

+ Notes

- Search radius within 500m of the site boundary
- Includes an OS location map with current and historical land use maps
- Sensitivity map with separate flood map
- Comes with a professional opinion from Argyll Environmental Consultants
- £10 million PI cover and complete protection against Part IIA of the Environmental Protection Act 1990

+ Notes

- Search radius within 250m of the site boundary
- Examines the site for:
 - Overall flood risk
 - Insurability
 - Flood defences
 - Individual flood risks
- Comes with a professional opinion and recommendations from Argyll Environmental Consultants
- £10 million PI cover and complete protection against Part IIA of the Environmental Protection Act 1990

SECTION 8

- If you are selecting Image as a print output you will need to select the image format you require
- Select the format for your exports and add gridlines within the **Basket**
- For your reports you will be able to edit the Site address again at this stage
- You will be required to add references for each item ordered, before you can submit your order
- Once you have selected **Submit Order**, Promap will prompt you to save your orders and then take you to the **Order History** section

+ Notes

- **Order History** is accessible by selecting the Account icon in the top right-hand corner of the main map screen
- Selecting your order from the list will display its details in the right-hand section of the Order History box, where you will be able to select the required action
- On the left hand side of Order History you will find a number of options that will allow you to track specific reports. These Include:
 - **Keywords**
 - **Order Type**
 - **Order Date**
 - **Your orders or company orders**
 - **Licence Status**

Need environmental planning advice you can trust?

SECTION 9

- Views enable you to view the OS MasterMap Topography Layer. One view is equivalent to 1km² of mapping
- Discounts are available when bulk purchasing Views
- Your current View balance is available in the top header bar, as outlined above, and will update whenever you incur a viewing or roaming charge on the OS Mastermap Topography Layer

Pay-as-you-go

- Alternatively, a pay-as-you-go model is available for MasterMap viewing charges
- With this method a **View Confirmation** box (below) will appear prior to incurring any costs and you will be required to add a **Project Ref**, a **PO Ref** and accept the charge before you can go any further
- It is recommended that you decide on a format for what you enter into the two reference boxes as this information will be appearing on your monthly invoice and will assist in allocating costs. It will also help when tracking spend using the accounts section

Spend reporting

- There are two methods of tracking your expenditure:
 - Selecting **Account**, which is found under the **Account** Icon in the top right-hand corner of the screen, will show you your recent spend on the system

- Selecting **Admin**, which is found under the **Account** icon in the top right hand corner of the screen, and then selecting **Expenditure** will present you with the search options displayed, allowing you to track all spend

Account administration (account administrator)

- The designated admin user within the organisation will have access to a number of additional options under the **Admin** section in Promap as follows:
 - **Users** allows you to add new users for the company and have the option to stop their account or make them an admin user
 - **User Groups** allows you to create user groups within the system, which then allows you to save maps so that only people within that group can see them
 - **Offices** allows you to add new offices for the organisation
 - **My Settings** is available to all users and will display that user's details
 - **Expenditure** is also available to all users although the admin user will have more report options available to them and can track spend at an organisational level
 - **Restrictions** allows you to apply spend limits at either an individual user or organisation level
 - **PMCL** allows them to enter the companies PMCL Licence for Ordnance Survey mapping
